

GEELON SO

Ph.D. Student, University of California, San Diego
Department of Computer Science and Engineering
9500 Gilman Drive, Mail Code 0404 · La Jolla, CA 92093

Phone: (773) 621-9265
Email: geelon@ucsd.edu
Website: <https://geelon.github.io>

RESEARCH

Machine learning theory, sequential decision making, stochastic analysis, optimization, geometry

EDUCATION

University of California, San Diego

Ph.D. Student, Computer Science

La Jolla, CA

Sep 2019—present

- Advisors: *Sanjoy Dasgupta, Yian Ma*
- Relevant courses: *Probability Theory, Stochastic Analysis, Differential Geometry, Computational Statistics, Unsupervised Learning, Continual Learning, Computational Neurobiology, Lattice Algorithms, Cybersecurity*

Columbia University

M.S. Computer Science

New York, NY

May 2019

- Advisor: *Daniel Hsu*
- Thesis: *Active learning with noise*
- Relevant courses: *Learning theory, Unsupervised Learning, Graph Theory, Information Theory, Algorithms through Geometric Lens, Deep Learning, Computer Networks, Privacy-Preserving Technologies*

The University of Chicago

B.S. Mathematics with Honors

Chicago, IL

Jun 2017

- Advisor: *Stuart Kurtz*
- Relevant courses: *Algebraic Geometry, Commutative Algebra, Algebraic Number Theory, Topology, Honors Algebra, Honors Analysis (real & functional analysis, measure theory), Markov Chains, Quantum Mechanics*

EXPERIENCE

Seekr (news search engine company)

Machine learning research and engineering intern

Carlsbad, CA

Jun 2022—Jun 2023

- Spearheaded the overhaul of the trending news labeling process; developed a human-in-the-loop system to enable rapid experimentation with diverse rules- and ML-methods for keyword extraction and labeling
- Engineered a data exploration tool to help developers gain intuition for the underlying news/text data; created modular system, streamlining new and iterative refinement of label extraction methods
- Built a user-friendly GUI for human evaluation of label quality
- The incorporation of the redesign resulted in significantly more expressive and meaningful topic labels

Home Partners of America (REIT company)

Data science and engineering intern

Chicago, IL

Jun 2019—Aug 2019

- Identified, planned and executed a high-impact project given limited resource and time constraints
- Streamlined ETL for the analytics team by providing API to automatically join, transform and aggregate data, while performing data quality checks with statistical guarantees; eliminated need to understand how the history of business decisions affects the correct way to join tables
- Designed backend to API to be easily adaptable to future changes in data collection/database

AumiPhyte Health (healthcare startup)

New York, NY

Machine learning consultant

Feb 2018—Mar 2019

- Designed user-centric system and tools to analyze and process medical texts, presenting recommendations in a whitepaper that detailed motivation, implementation, rationale, and limitations
- Implemented rules- and machine-learning based text processing methods using python and spaCy to generate label data for small set of medical texts; estimated 0.9 accuracy with 0.9 confidence
- Developed GUI utilizing active learning techniques to help user rapidly label data

Options for Youth/University of Chicago (non-profit consulting course)

Chicago, IL

Non-profit consultant

Mar 2016—Jun 2016

- Conducted quantitative/qualitative impact assessment for a local nonprofit by (i) researching and building a model to estimate the return on investment and (ii) interviewing stakeholders and recording impact; provided actionable best practices for using impact assessment to target donors

UChicago Math REU (research experience for undergrads)

Chicago, IL

Undergraduate researcher

Summers 2014, 2015, 2016

- Studied foundations of mathematics, intuitionistic type theory and category theory; advised by Stuart Kurtz. Studied dynamical systems and quantum computing; advised by Clark Butler, Tori Akin, and Peter May

Chicago Summer School in Mathematics (analysis and topology)

Chicago, IL

Invited student

Summers 2015, 2016

TEACHING**The Institute for Emerging CORE Methods in Data Science**

La Jolla, CA

Lecturer for the Foundations in Data Science high school summer program

Jul 2023—Aug 2023

- Designed and presented 5 lectures/homework for a module on linear algebra; director: *Rajiv Ghandi*

University of California, San Diego

La Jolla, CA

Teaching assistant

- Machine Learning, *Yian Ma, Fall 2022*; Probability and Statistics, *Sanjoy Dasgupta, Fall 2020*

Columbia University

New York, NY

Teaching assistant

- Awarded fellowship; presented 15 hours of lectures on unsupervised learning techniques; designed 9 homework problems; taught over 100 hours during office hours and individual meetings
- Unsupervised Learning, *Nakul Verma, Summer 2018*; Machine Learning, *Nakul Verma, Summer 2018*; Graph Theory, *Tim Sun, Spring 2018*; Geographic Information Systems, *Michael Parrott, Fall 2017*

SKILLSPython, Pytorch, C, Haskell, Bash, Linux, GIS, SQL, technical writing, \LaTeX **AWARDS****2020 UC San Diego Changemaker Challenge 1st Place**

In the UC San Diego COVID-19 Contact Tracing Challenge, sponsored by XYO

2019 Andrew P. Kosoresow Memorial Award for Excellence in Teaching and Service

Awarded for outstanding contributions to teaching in the Department of Computer Science at Columbia University and exemplary service to the Department and its mission

SERVICE

Conference Reviewing

Reviewer for AISTATS 2022, 2023, 2024; NeurIPS 2023

UC San Diego Diversity Fellowship Committee

Reviewer

La Jolla, CA

Jan 2020, Jan 2021

CSE/HDSI Ph.D. Visit Day

Coordinator for AI/ML group

La Jolla, CA

Mar 2020, Mar 2021

Google/UC San Diego ExploreCSR Mentorship Program

Volunteer mentor

San Diego, CA

Oct 2019—Jun 2020

- Designed/taught a computational thinking course for underserved students in computer science

Friends of Washington Park

Volunteer mentor

Chicago, IL

Jan 2014—Jul 2017

- Tutored 5th–8th grader students in an after-school program in local neighborhood of Hyde Park

PUBLICATIONS

Authors in alphabetical order unless otherwise noted.

Abhishek Roy*, Geelon So*, and Yi-An Ma. *Optimization on Pareto sets: On a theory of multi-objective optimization*. arXiv, under review, 2023. *equal contribution.

Sanjoy Dasgupta and Geelon So. *Online nearest neighbor classification*. arXiv, under review, 2023.

Sanjoy Dasgupta, Gaurav Mahajan, and Geelon So. *Convergence of online k-means*. International Conference on Artificial Intelligence and Statistics, 2022.

Geelon So. *Active learning with noise*. Master's thesis, Columbia University, 2019.

Geelon So. *Quantum computing: efficient prime factorization*. REU report, UChicago, 2015.

Geelon So. *Dynamical systems: symbolic dynamics*. REU report, UChicago, 2014.

TALKS

Paper talks and posters

- FODSI CCSI Student Posters (MIT) Jun 2023
- EnCORE Student Social (UCSD) Mar 2023
- AISTATS Poster Session (Virtual) Mar 2022

Reading seminars

- Forecasting and calibration (UCSD) 2023
- Algorithmic game theory (UCSD) 2022—2023
- Weak supervision for text data (Seekr) 2022
- Unsupervised learning (UCSD) 2022
- Sampling/MCMC (UCSD) 2021—2022
- Neural networks (UCSD) 2020
- Learning theory (UCSD) 2019
- Sums-of-squares optimization (Columbia) 2018
- Generalization theory (Columbia) 2018
- Type theory (UChicago) 2016—2017

Reading seminar presentations

- [Calibrated learning and games](#) *Dec 2023*
- [Universal prediction of individual sequences](#) *Nov 2023*
- [Introduction to neural nets](#) *Jul 2023*
- [Convergent message passing](#) *Jul 2023*
- [Gradient-based multiobjective optimization](#) *Apr 2023*
- [Introduction to mean-field games](#) *Feb 2023*
- [The double descent phenomenon](#) *Nov 2022*
- [Multicriteria decision making](#) *Oct 2022*
- [Learning with multi-modal data: canonical correlation analysis](#) *Sep 2022*
- [Gradient-based learning in games](#) *Apr 2022*
- [Linear system identification with reverse experience replay](#) *Apr 2022*
- [Introduction to algorithmic game theory](#) *Mar 2022*
